

# NGUYEN GIA HUY

## DevOps Engineer

johnnynguyen882@gmail.com | 0948385149 | linkedin.com/in/huy8bit

### PROFESSIONAL SUMMARY

DevOps-focused engineer with nearly three years of experience automating infrastructure and delivery for fintech and banking platforms. Ran cluster lifecycle operations for **50+ production Kubernetes clusters** on an OpenStack private cloud with Cluster API, including zero-downtime upgrades, and automated about **80%** of data center provisioning. Built the AWS EKS deployment and CI/CD pipeline for a Thought Machine Vault Core banking platform. Completed the DevOps on AWS Specialization (Coursera).

### TECHNICAL SKILLS

**Kubernetes & Containers:** Kubernetes, Cluster API, Docker, Amazon EKS, Amazon ECS, Amazon ECR  
**Cloud:** AWS, OpenStack (private cloud)  
**Infrastructure as Code:** Terraform, AWS SAM  
**CI/CD:** Pipeline design (build, test, deploy), Jenkins, ArgoCD, Git  
**Observability:** Prometheus, Grafana, OpenTelemetry, ELK, CloudWatch, DataDog  
**Security & Traffic:** Kong Gateway, Keycloak (RBAC, multi-tenancy), HashiCorp Vault, Consul  
**Scripting & Tooling:** Golang, Python

### WORK EXPERIENCE

**Middle Software Engineer – Cloud Infrastructure & Automation** 03/2026 – Present

**Galaxy FinX (Vikki Digital Bank)** | *core banking platform built on Thought Machine Vault Core*

- Stood up a new **Thought Machine Vault Core** release on AWS, provisioning and wiring together **EKS, RDS, ECR, and ELB** for the bank's core banking platform.
- Built the platform's **CI/CD pipeline**, automating build, test, and deployment of Vault Core releases.
- Replaced a Gauge-based simulation test suite with a **Golang** framework, cutting test runtime from **24 minutes to just over 50 seconds (20x faster)**.
- Built and deployed the account migration workload on **ECS and Lambda** backed by RDS, reducing migration runs from **2.5 hours to 27 minutes**.

**Software Engineer – Data Platform Infrastructure** 04/2025 – 03/2026

**Vietlink (KDDI Agile Development Center Group)** | *au Denki – large-scale electric utility platform serving millions of users*

- Managed the AWS data platform as code with **Terraform** and **AWS SAM**, covering both serverless (Lambda) and containerized (ECS) pipeline workloads.
- Set up **CloudWatch** and **DataDog** monitoring for pipeline health, failures, and operational anomaly detection on a platform serving millions of users.
- Operated ETL workloads across Lambda, ECS, RDS, S3, and Athena, and reworked batch execution for parallelism to raise throughput by **150%**.

**Cloud Platform Engineer (Software Engineer)** 04/2024 – 04/2025

**VNPAY** | *VNPAY Cloud – cloud platform for fintech and enterprise customers*

- Designed and operated the **OpenStack** private cloud behind VNPAY Cloud, running **50+ production Kubernetes clusters** for fintech and enterprise customers.
- Automated Kubernetes **cluster lifecycle** with **Cluster API**: declarative provisioning, scaling, and rolling upgrades with **zero downtime** on production clusters.
- Automated about **80%** of data center provisioning and infrastructure configuration, removing most manual work.
- Integrated and operated **Kong Gateway** in front of **100+ microservices**, enforcing service-level and network-level access control.
- Implemented multi-tenant authentication and authorization with **Keycloak** and RBAC, isolating **20+ customer organizations** on shared infrastructure.

**Blockchain Developer** 06/2023 – 09/2023

**EsolLabs** | *Innovaz Market Factory – cross-chain NFT and token platform*

- Built event-driven backend services that sync on-chain events from **5+ blockchain networks** into off-chain databases and APIs.

### SELECTED PROJECTS

**DattingQ** | Software Engineer *Dating platform*

- Implemented **multi-cluster failover** and the observability stack (OpenTelemetry, Prometheus, Grafana, ELK, ClickHouse), sustaining **99.95% uptime**.
- Built a gRPC-Gateway, Kafka, MongoDB, and Redis backend serving **1.5K requests/second** at **80–100 ms**.

### EDUCATION & CERTIFICATIONS

**University of Science, Ho Chi Minh City (HCMUS)**

B.Sc. Information Technology – Knowledge Engineering

**DevOps on AWS Specialization** | Coursera
