

NGUYEN GIA HUY

Platform Engineer

johnnynguyen882@gmail.com | 0948385149 | linkedin.com/in/huy8bit

PROFESSIONAL SUMMARY

Platform engineer who builds the shared foundations other engineers ship on. At VNPAY Cloud, ran a multi-tenant Kubernetes platform of **50+ production clusters** on OpenStack and Cluster API, with shared API gateway (Kong, **100+ services**) and identity (Keycloak, **20+ tenant organizations**) layers. At a digital bank, built internal tooling: a Golang simulation testing framework that turned a **24-minute** test run into **under a minute**, and the AWS delivery path for the core banking platform.

TECHNICAL SKILLS

Kubernetes Platform:	Kubernetes, Cluster API, OpenStack, Docker, Amazon EKS
Shared Platform Services:	Kong Gateway (API gateway), Keycloak (identity, RBAC, multi-tenancy), Consul, HashiCorp Vault
Developer Tooling:	Test frameworks in Golang, CI/CD pipelines, Jenkins, ArgoCD, Git
Infrastructure as Code:	Terraform, AWS SAM
Observability:	OpenTelemetry, Prometheus, Grafana, ELK, CloudWatch, DataDog
Languages:	Golang, Python

WORK EXPERIENCE

Middle Software Engineer – Internal Tooling & Delivery Platform 03/2026 – Present

Galaxy FinX (Vikki Digital Bank) | *core banking platform built on Thought Machine Vault Core*

- Rebuilt the team's **simulation testing framework** from a Gauge-based suite into a **Golang** framework, cutting execution from **24 minutes to just over 50 seconds (20x faster)** and shortening the development feedback loop.
- Built the delivery path for the Vault Core platform: AWS infrastructure on **EKS, RDS, ECR, and ELB** plus a **CI/CD pipeline** that automates build, test, and deployment.
- Built the account migration tooling in Golang on ECS, Lambda, and RDS, reducing a migration run from **2.5 hours to 27 minutes (5x faster)**.

Software Engineer – Data Platform 04/2025 – 03/2026

Vietlink (KDDI Agile Development Center Group) | *au Denki – large-scale electric utility platform serving millions of users*

- Codified the data platform with **Terraform** and **AWS SAM**, and gave it **CloudWatch** and **DataDog** monitoring for pipeline health, failures, and anomalies.
- Moved the platform's search and analytics backend from **Elasticsearch to OpenSearch**, redesigning ingestion and indexing flows for stability and consistency.

Platform Engineer (Software Engineer) 04/2024 – 04/2025

VNPAY | *VNPAY Cloud – cloud platform for fintech and enterprise customers*

- Built and operated VNPAY Cloud's **Kubernetes platform** on OpenStack and **Cluster API**, offering automated cluster provisioning, scaling, and **zero-downtime upgrades** across **50+ production clusters**.
- Ran **Kong Gateway** as the shared API gateway for a **100+ service** ecosystem, centralizing service-level and network-level access control in one layer.
- Delivered multi-tenant identity as a platform capability with **Keycloak** and RBAC, giving **20+ customer organizations** isolated authentication and authorization.
- Turned about **80%** of data center provisioning and infrastructure configuration into automation, replacing manual operational processes.

Blockchain Developer 06/2023 – 09/2023

EsolLabs | *Innovaz Market Factory – cross-chain NFT and token platform*

- Built event-driven backend services synchronizing on-chain events from **5+ blockchain networks** into off-chain databases and APIs.

SELECTED PROJECTS

DattingQ | Software Engineer *Dating platform*

- Implemented **multi-cluster failover** and a shared observability stack (**OpenTelemetry, Prometheus, Grafana, ELK, ClickHouse**), keeping the platform at **99.95% uptime**.

EDUCATION & CERTIFICATIONS

University of Science, Ho Chi Minh City (HCMUS) B.Sc. Information Technology – Knowledge Engineering

DevOps on AWS Specialization | Coursera
