

NGUYEN GIA HUY

Cloud Engineer

johnnynguyen882@gmail.com | 0948385149 | linkedin.com/in/huy8bit

PROFESSIONAL SUMMARY

Cloud engineer with production experience on both public and private cloud. On **AWS**, has provisioned and operated workloads on EKS, ECS, Lambda, RDS, S3, Athena, ECR, and Elastic Load Balancing for a digital bank and for a utility platform serving millions of users. On private cloud, designed and operated VNPAY Cloud's **OpenStack** platform hosting **50+ production Kubernetes clusters**, with identity-based tenant isolation for **20+ customer organizations**.

TECHNICAL SKILLS

AWS Compute:	Amazon EKS, Amazon ECS, AWS Lambda, Amazon ECR
AWS Data & Network:	Amazon RDS, Amazon S3, Amazon Athena, Elastic Load Balancing
Private Cloud:	OpenStack, Cluster API, Kubernetes, Docker
Provisioning:	Terraform, AWS SAM
Identity & Access:	Keycloak, RBAC, multi-tenant isolation, Kong Gateway, HashiCorp Vault
Cloud Operations:	CloudWatch, DataDog, Prometheus, Grafana
Languages:	Golang, Python

WORK EXPERIENCE

Middle Software Engineer – AWS Cloud Infrastructure 03/2026 – Present

Galaxy FinX (Vikki Digital Bank) | *core banking platform built on Thought Machine Vault Core*

- Deployed a new Thought Machine Vault Core version on AWS, running the platform on **EKS** with **RDS** as its database, **ECR** for container images, and **ELB** for load balancing.
- Built the account migration system on a mix of **ECS** containers and **Lambda** functions over RDS (Golang), cutting migration time from **2.5 hours to 27 minutes (5x faster)**.
- Automated releases of the platform with a CI/CD pipeline covering build, test, and deployment.

Software Engineer – AWS Data Platform 04/2025 – 03/2026

Vietlink (KDDI Agile Development Center Group) | *au Denki – large-scale electric utility platform serving millions of users*

- Built and operated serverless and containerized ETL on **Lambda, ECS, S3, Athena, and RDS**, processing large-scale utility data for au Denki.
- Provisioned the platform's AWS resources with **Terraform** and **AWS SAM**, and monitored them with **CloudWatch** and **DataDog**.
- Scaled batch processing throughput by **150%** by reworking pipelines for parallel execution and leaner data access.

Cloud Engineer, OpenStack & Kubernetes (Software Engineer) 04/2024 – 04/2025

VNPAY | *VNPAY Cloud – cloud platform for fintech and enterprise customers*

- Designed and operated the **OpenStack**-based private cloud behind VNPAY Cloud, hosting **50+ production Kubernetes clusters** for a fintech and enterprise customer base.
- Used **Cluster API** to provision and scale Kubernetes clusters on OpenStack infrastructure declaratively and to roll out **zero-downtime upgrades**.
- Implemented tenant isolation for **20+ customer organizations** with **Keycloak**-based multi-tenant authentication and role-based access control.
- Controlled service-level and network-level access for **100+ microservices** through **Kong Gateway**.
- Automated about **80%** of data center provisioning and infrastructure configuration.

Blockchain Developer 06/2023 – 09/2023

EsolLabs | *Innovaz Market Factory – cross-chain NFT and token platform*

- Built event-driven services syncing on-chain events into off-chain databases across **5+ blockchain networks**.

SELECTED PROJECTS

DattingQ | Software Engineer *Dating platform*

- Ran the backend across multiple clusters with **failover**, monitored through OpenTelemetry, Prometheus, Grafana, ELK, and ClickHouse, at **99.95% uptime** and up to **1.5K requests/second**.

EDUCATION & CERTIFICATIONS

University of Science, Ho Chi Minh City (HCMUS) B.Sc. Information Technology – Knowledge Engineering

DevOps on AWS Specialization | Coursera
