PROFESSIONAL SUMMARY

Software engineer with nearly three years of end-to-end delivery across banking, energy, and cloud platforms, from financial product logic and Golang tooling to AWS data pipelines and multi-tenant Kubernetes infrastructure. Consistently turns bottlenecks into measured wins: **20x faster** test execution, **5x faster** account migration, **150%** higher batch throughput, and about **80%** of data center provisioning automated.

TECHNICAL SKILLS

Languages: Golang, Python, SQL, Java
Backend Systems: gRPC, REST, microservices, Kafka, event-driven services
Data: PostgreSQL, MongoDB, Redis, OpenSearch, ClickHouse, Amazon Athena
Cloud & Infrastructure: AWS, OpenStack, Kubernetes, Docker, Terraform
Reliability & Delivery: OpenTelemetry, Prometheus, Grafana, CloudWatch, DataDog, CI/CD

WORK EXPERIENCE

Middle Software Engineer, Core Banking 03/2026 – Present

Galaxy FinX (Vikki Digital Bank) | *core banking platform built on Thought Machine Vault Core*

- **Product:** built the Lending and Overdraft products on Thought Machine Vault Core in Python, from interest accrual and late fees to repayment and settlement.
- **Testing:** rebuilt the 24-minute Gauge-based simulation test suite in **Golang**; it now finishes in **just over 50 seconds (20x faster)**.
- **Data:** built the account migration system in Golang on ECS, Lambda, and RDS, bringing a migration from **2.5 hours down to 27 minutes**.
- **Delivery:** deployed the new Vault Core version on AWS EKS with its CI/CD pipeline, and integrated the platform with external backend services.

Software Engineer 04/2025 – 03/2026

Vietlink (KDDI Agile Development Center Group) | *au Denki – large-scale electric utility platform serving millions of users*

- Designed and ran AWS ETL pipelines that turn large-scale utility data into inputs for analytics and operations.
- Redesigned batch workflows with parallel execution and leaner data access, raising pipeline throughput by **150%**.
- Migrated search and analytics from **Elasticsearch to OpenSearch**, rebuilding ingestion and indexing for stability and better query performance.

Software Engineer 04/2024 – 04/2025

VNPAY | *VNPAY Cloud – cloud platform for fintech and enterprise customers*

- Designed and operated a private cloud on OpenStack and Cluster API serving **50+ production Kubernetes clusters** with zero-downtime upgrades.
- Secured a **100+ service** microservices ecosystem with Kong Gateway access control and Keycloak-based multi-tenant RBAC for **20+ customer organizations**.
- Automated about **80%** of data center provisioning and infrastructure configuration.

Blockchain Developer 06/2023 – 09/2023

EsolLabs | *Innovaz Market Factory – cross-chain NFT and token platform*

- Wrote and reviewed **15+ smart contracts** in Solidity and Move, and built the event-driven services linking them to off-chain databases across **5+ blockchain networks**.

SELECTED PROJECTS

DattingQ | Software Engineer *Dating platform*

- Built a gRPC-Gateway, Kafka, MongoDB, and Redis backend at up to **1.5K requests/second** and **80–100 ms** latency, with multi-cluster failover for **99.95% uptime**.

MeetQ | Software Engineer *AI-powered online meeting platform*

- Built a LiveKit meeting platform with OpenAI-powered live transcription, voice translation, and summaries, and designed its real-time translation pipeline.

EDUCATION & CERTIFICATIONS

University of Science, Ho Chi Minh City (HCMUS) B.Sc. Information Technology – Knowledge Engineering

DevOps on AWS Specialization | Coursera
