

NGUYEN GIA HUY

Golang Backend Engineer

johnnynguyen882@gmail.com | 0948385149 | linkedin.com/in/huy8bit

PROFESSIONAL SUMMARY

Backend engineer working mainly in Golang. Built an account migration system and a simulation testing framework for a core banking platform, and has developed gRPC services backed by Kafka, MongoDB, and Redis. Interested in performance, reliability, and clean service design.

TECHNICAL SKILLS

Languages: Golang, Python, SQL
Backend: gRPC, gRPC-Gateway, REST APIs, Protocol Buffers
Data & Messaging: PostgreSQL, MongoDB, Redis, Kafka
Infrastructure: Docker, Kubernetes, AWS (ECS, Lambda, RDS)
Observability: OpenTelemetry, Prometheus, Grafana

WORK EXPERIENCE

Golang Backend Engineer, Core Banking (Middle Software Engineer) 03/2026 – Present
Galaxy FinX (Vikki Digital Bank) | *core banking platform built on Thought Machine Vault Core*

- Designed and built an account migration system in Golang for the core banking platform, running on AWS ECS and Lambda with RDS. Migration time dropped from **2.5 hours to 27 minutes**.
- Rewrote the Vault Core simulation testing framework in Go, replacing the legacy Gauge-based framework and reducing test runs from **24 minutes to just over 50 seconds**.
- Integrated Thought Machine Vault Core with the bank's external backend services for core banking operations and transaction workflows.
- Deployed a new Vault Core version on AWS (EKS, RDS, ECR, ELB) and built its CI/CD pipeline.
- Developed and maintained Lending and Overdraft logic (interest accrual, penalty and late fees, repayment, settlement) as Python Smart Contracts on Vault Core.

Software Engineer – Backend & Data Services 04/2025 – 03/2026
Vietlink (KDDI Agile Development Center Group) | *au Denki – large-scale electric utility platform serving millions of users*

- Improved batch processing throughput by **150%** by redesigning the pipelines around parallel execution and more efficient data access.
- Built and operated ETL services on AWS Lambda and ECS that process large-scale utility data, using S3, Athena, and RDS for storage and queries.
- Migrated the search backend from Elasticsearch to OpenSearch and reworked its ingestion and indexing for better stability, consistency, and query performance.
- Managed the infrastructure with Terraform and AWS SAM and set up CloudWatch and DataDog monitoring.

Software Engineer 04/2024 – 04/2025
VNPAY | *VNPAY Cloud – cloud platform for fintech and enterprise customers*

- Worked on a microservices ecosystem of **100+** services behind Kong Gateway, integrating and operating the gateway's service-level and network-level access rules.
- Added Keycloak-based login and role-based permissions for **20+** tenant organizations, keeping each tenant isolated.
- Kept **50+** production Kubernetes clusters running on OpenStack, using Cluster API to provision, scale, and upgrade them without downtime.
- Automated roughly **80%** of the provisioning and configuration work in the data center.

Blockchain Developer

06/2023 – 09/2023

EsolLabs | *Innovaz Market Factory – cross-chain NFT and token platform*

- Built backend services that listen for on-chain events on **5+** chains and write them to off-chain databases and APIs, with consistent transaction handling.
- Developed and reviewed **15+** Solidity and Move contracts for DeFi and NFT features.

KEY PROJECT

DattingQ | Software Engineer

Dating platform

- Built the backend API with gRPC and gRPC-Gateway, serving REST/JSON endpoints generated from Protocol Buffer definitions.
- Used Kafka for messaging and MongoDB and Redis for storage; the service handled up to **1.5K** requests per second at 80–100 ms latency.
- Set up multi-cluster failover and observability with OpenTelemetry, Prometheus, Grafana, ELK, and ClickHouse, keeping uptime at **99.95%**.

MeetQ | Software Engineer

AI-powered online meeting platform

- Built a real-time meeting platform on LiveKit with OpenAI-based transcription, voice translation, and summaries, and designed its real-time translation pipeline.

EDUCATION & CERTIFICATIONS

University of Science, Ho Chi Minh City (HCMUS)

B.Sc. in Information Technology, Knowledge Engineering

DevOps on AWS Specialization | Coursera
